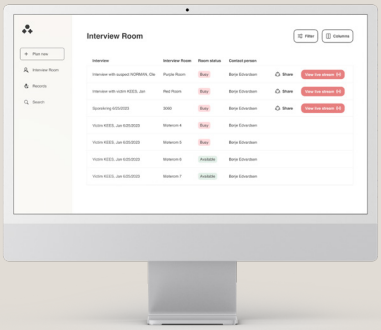
Ark Management



Interview management

Children or vulnerable witness interviews

Police investigation

Cloud or On-prem

A part of the toolset in ethical investigative interviewing.

Davidhorn Ark is an Interview Management Solution, seamlessly integrated with all of our recording devices. Ark can receive, monitor and retain interviews throughout the lifetime of the interviews.

Productivity features like speech-to-text and automated summaries are part of Ark as well as an ever-growing portfolio of features ensuring interviewers are accurate, effective and thorough when preparing, performing and evaluating interviews. Ark is built for cross-team collaboration and is highly configurable.

- Compliant with PACE/ MoPI
- Complete Audit Trail
- Evidence protection using digital fingerprint
- Task and workflow management
- Integration friendly
- Web-based (no access app needed)
